

Patent claims

1. Method of odorizing gas by adding *To said gas*
- 5 A. at least one acrylic C₁-C₁₂-alkyl ester,
- B. at least one N compound with a boiling point of from 90 to 210°C and a molecular weight of from 80 to 160 and optionally
- 10 C. an antioxidant.
2. Method according to Claim 1, *wherein said* ~~according to which~~ at least two different *C₁-C₁₂ alkyls* acrylic esters A are added.
3. Method according to Claim 1, *wherein said* ~~according to which~~ a mixture of two different acrylic C₁-C₆-alkyl esters is added as component A.
4. Method according to Claim 3, *wherein said* ~~according to which~~ the weight ratio of the two acrylic ester classes is 9:1 to 1:9.
5. Method according to Claims ~~1 to 4~~, *wherein said* ~~according to which~~ a compound of the formula

(I)

is used as component B, where

R¹ to R⁴, independently of one another, are hydrogen or C₁-C₄-alkyl.

SUB B10

6. Method according to Claims ~~1 to 5~~, ^{wherein} according to which component B is used in an amount of from 1 to 100 parts by weight per 1 000 parts by weight of A.

7. Method according to Claims ~~1 to 6~~, ^{wherein} according to which component C is used in an amount of from 0.01 to 5 parts by weight per 1 000 parts by weight of A.

8. Gas odorized by methods according to Claims 1 to 6.
